We create a new **user experience**
of product and provide full-cycle
custom development of web &
mobile applications.

Stronger together. Solar Digital is a power of 2 departments.

Solar Design Lab

We do anything about digital design: from visual identity of a brand, graphics design up to emotional promo websites and interfaces.

Solar Custom Software Solutions

We specialize in custom development and re-engineering of new digital products. We know how to build scalable and cost-effective web and mobile applications.

Designers help engineers.
Developers help designers.
Our duality means **our power**.
It helps us deliver **wise** and
beautiful solutions.

Models of work

01

Time and Material

Client gets to pay for the actual time and effort spent on implementing the software development project.

02

Project based approach

Predefined development budget with the exact deadline on when the project should be complete.

03

Dedicated team approach

Client builds the team according to the requirements, and this team can report directly to the client, or be supervised by a dedicated Project Manager.

Highlights of Our Best Work

Over the past 8 years, we've successfully completed
130+ projects for clients across 23 countries.

Stark Research

BIG DATA-DRIVEN ANALYTICAL SOLUTION FOR MARITIME LOGISTICS

Stark Research is an analytical tool for the shipping industry. It collects 1000.000+ international voyages data and helps to analyze the activity of a specific player or a whole market. The basis of the application is the unique data of bulk and liquid cargo flows through the ports and terminals of the Black and Azov Seas.

We did 4 versions of Web application and iOS app. Key features: realtime fleet positions on the map, 3 level of security, company connections, ice campaign, terminal turnover, season reports and summary of a whole market.

JDI Brokers

BRANDING AND IDENTITY FOR A BROKERAGE COMPANY

JDI is an abbreviation for the father's name of the company owner, which also can be read as Jedi from Star Wars.

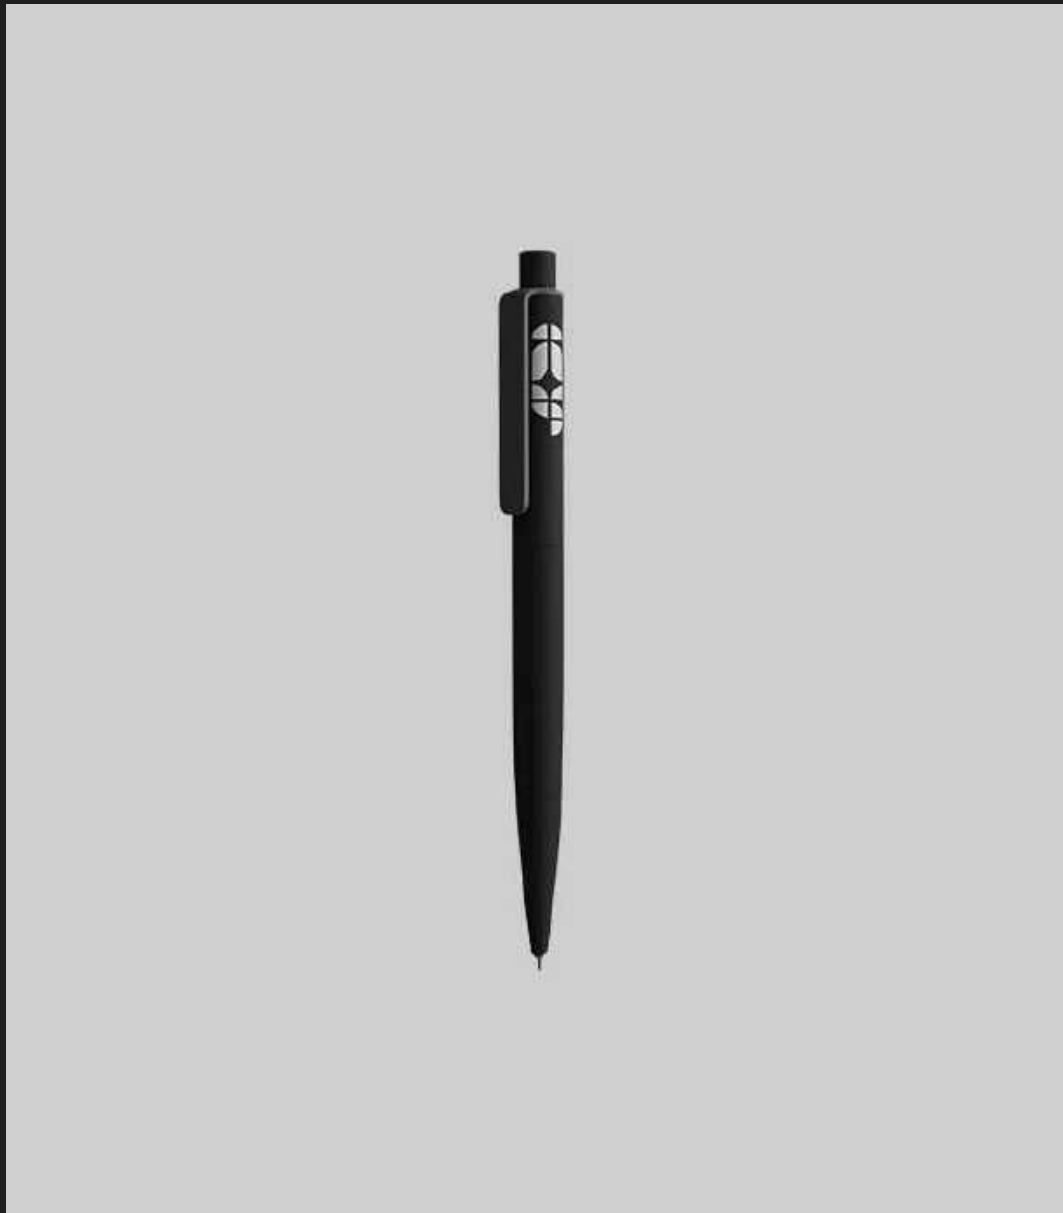

The symbol is based on the sword-star, cutting through the abbreviation of plant elements, the main exported resources, on which the company makes a profit — oil, grain, oil seed, and meal. Animated plant motifs symbolize the movement of the main value of the product — information around the market.

Domova

A NEW PRODUCT DEVELOPMENT FOR REAL ESTATE INDUSTRY

DOMOVA is a startup and a one-of-a-kind project that has no analogs on the market. Its mission is to help owners of emergency housing to sell it at a favorable price to construction companies and investors who are interested in acquiring such property and territory.

We worked on this project for more than a year with a big Agile team and created branding, a corporate website, and personal platform for selling and investment.

United house,
boundless opportunities

We help apartment owners agree on a joint sale of the building

Watch the video

DOMOVA is the only platform in the world that unites apartment and non-residential property owners of dilapidated or emergency houses for the purpose of a joint sale of the entire building to investors or construction companies.

About the DOMOVA

Users registered on the platform agree on a sale or a purchase of the apartment building and receive comprehensive assistance in the resettlement of it.

Gartal

FULL REBRANDING AND RE-DESIGN FOR REAL ESTATE
DEVELOPMENT COMPANY FROM PRAGUE

Gartal, a reputable real estate construction company from Prague, boasts two decades of industry expertise.

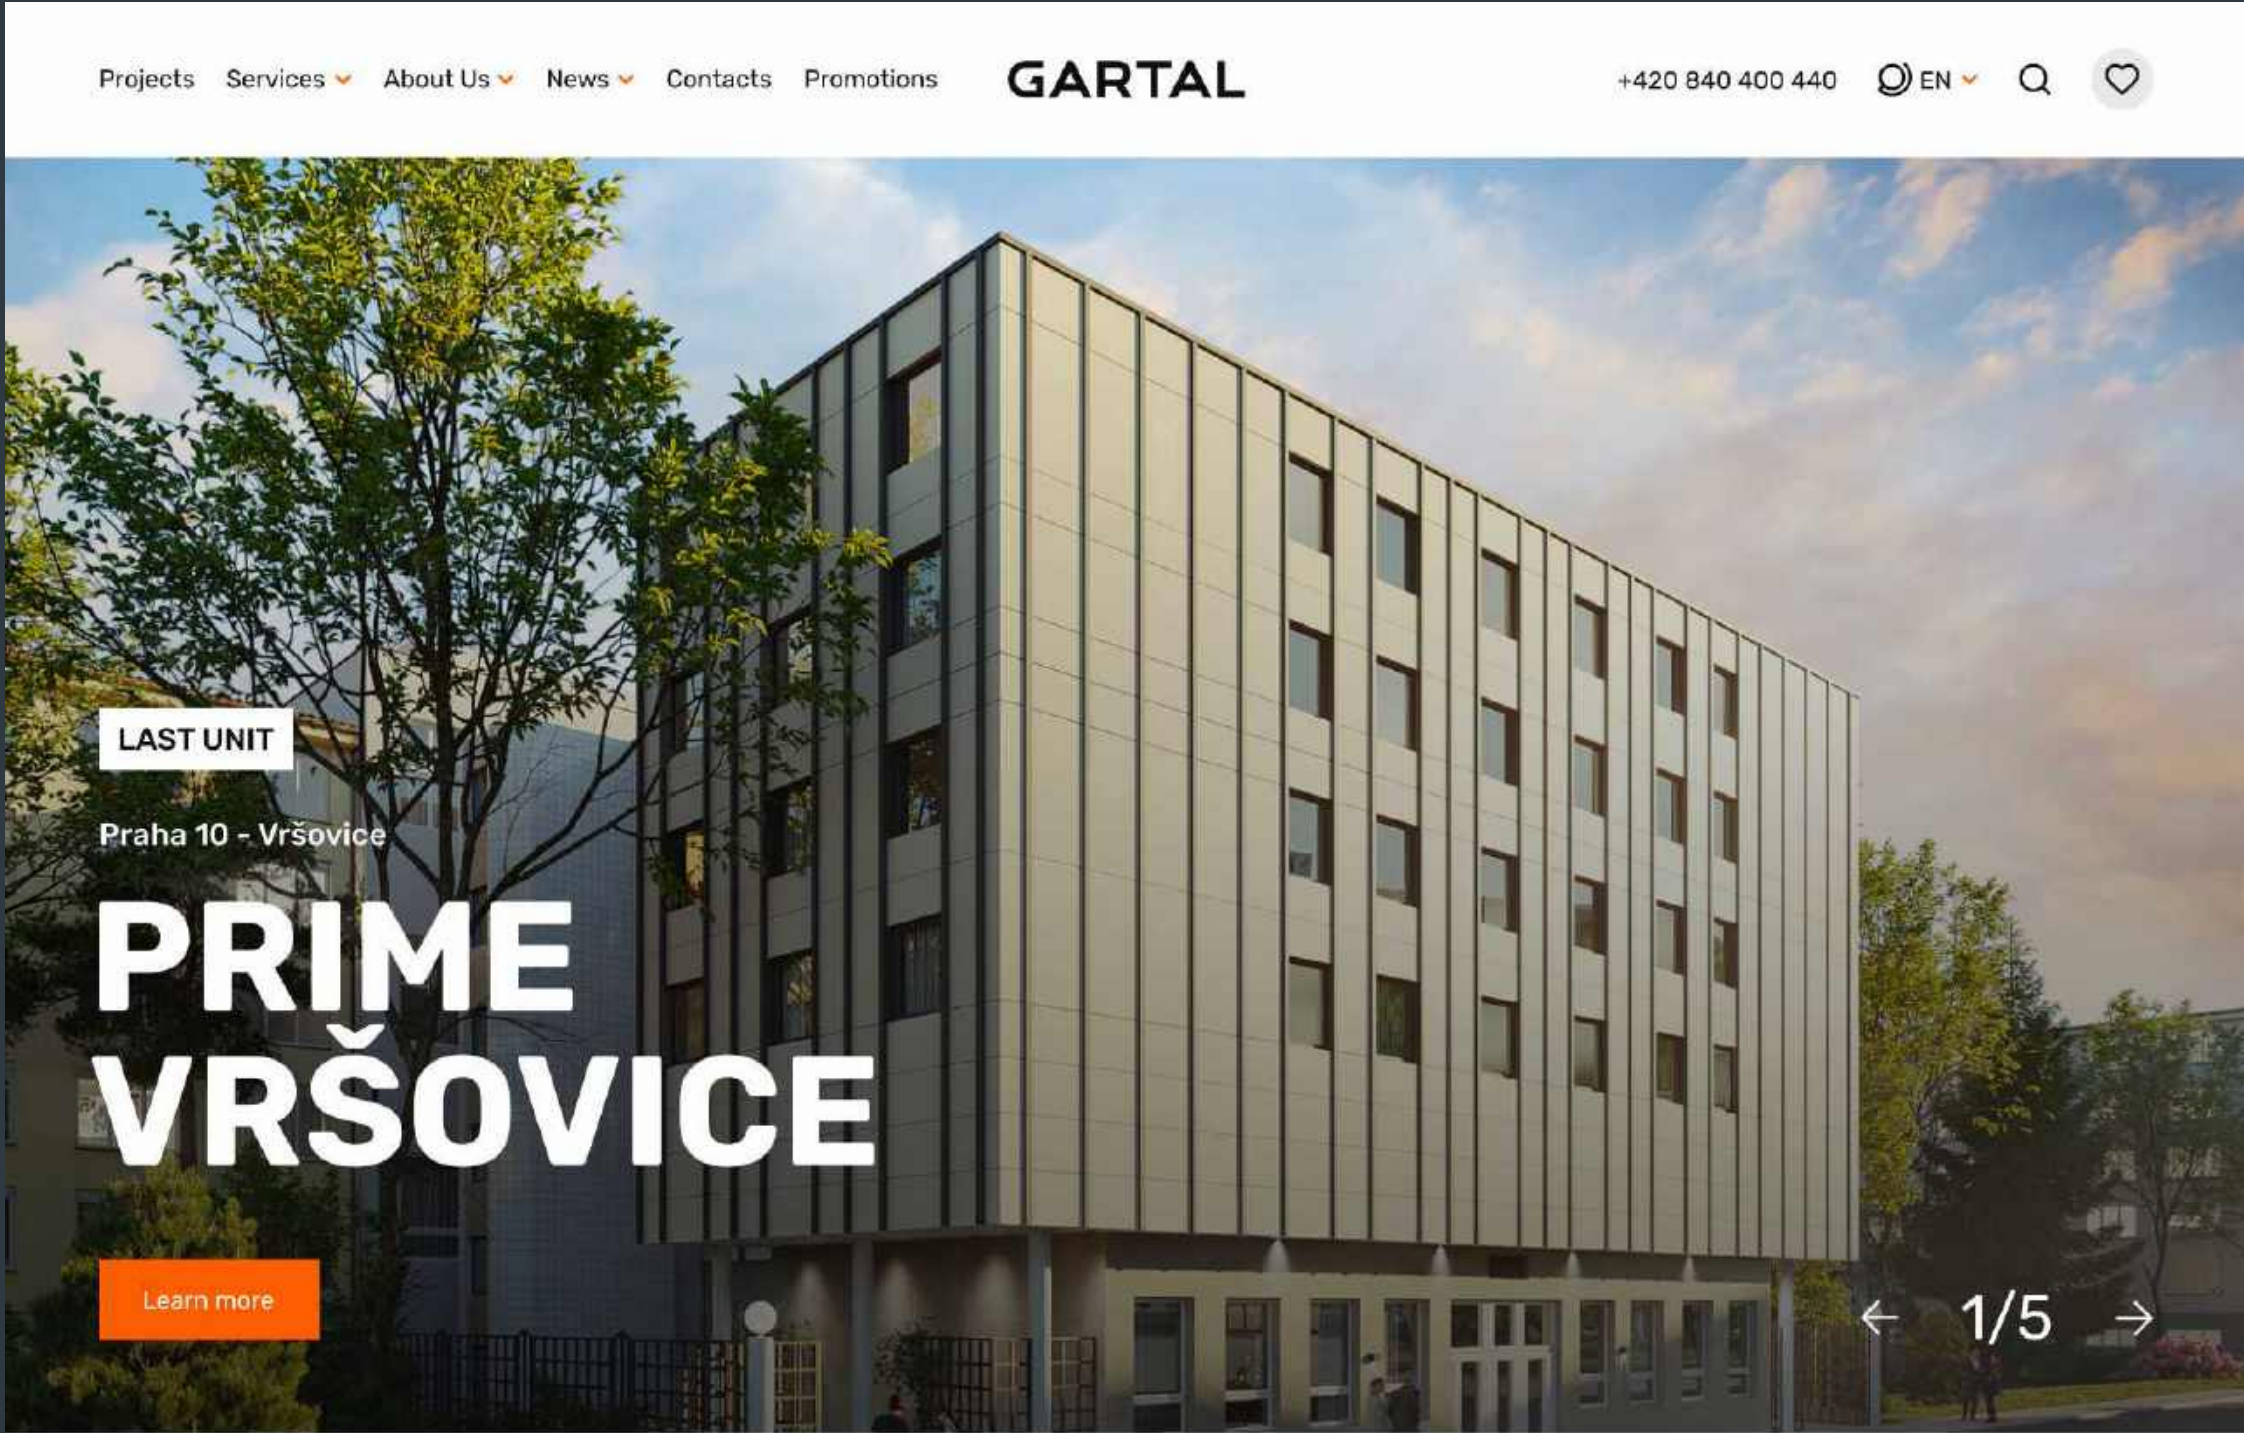

Doing a consideration from 130 other companies they decided to choose us to create new Branding for company. They were surprised that we did it with first attempt, and they straightaway decide to move forward with UX/ UI design of the new website.

In the end they organised a big party, presenting our rebranding to market, and marked that we started from evolution but finally did a revolution.

The Gartal Real Estate Development Group

Development is about evolution in a greater form. At least that's how we understand it in the GARTAL development group. We rely on the high quality of our projects and the life around them. We use modern technologies that increase the comfort of living, as well as innovations that support the sustainability and save the environment. More than others, we pay attention to the optimal use of space.

20	Years in the development industry	29	Real estate projects completed

Sailica

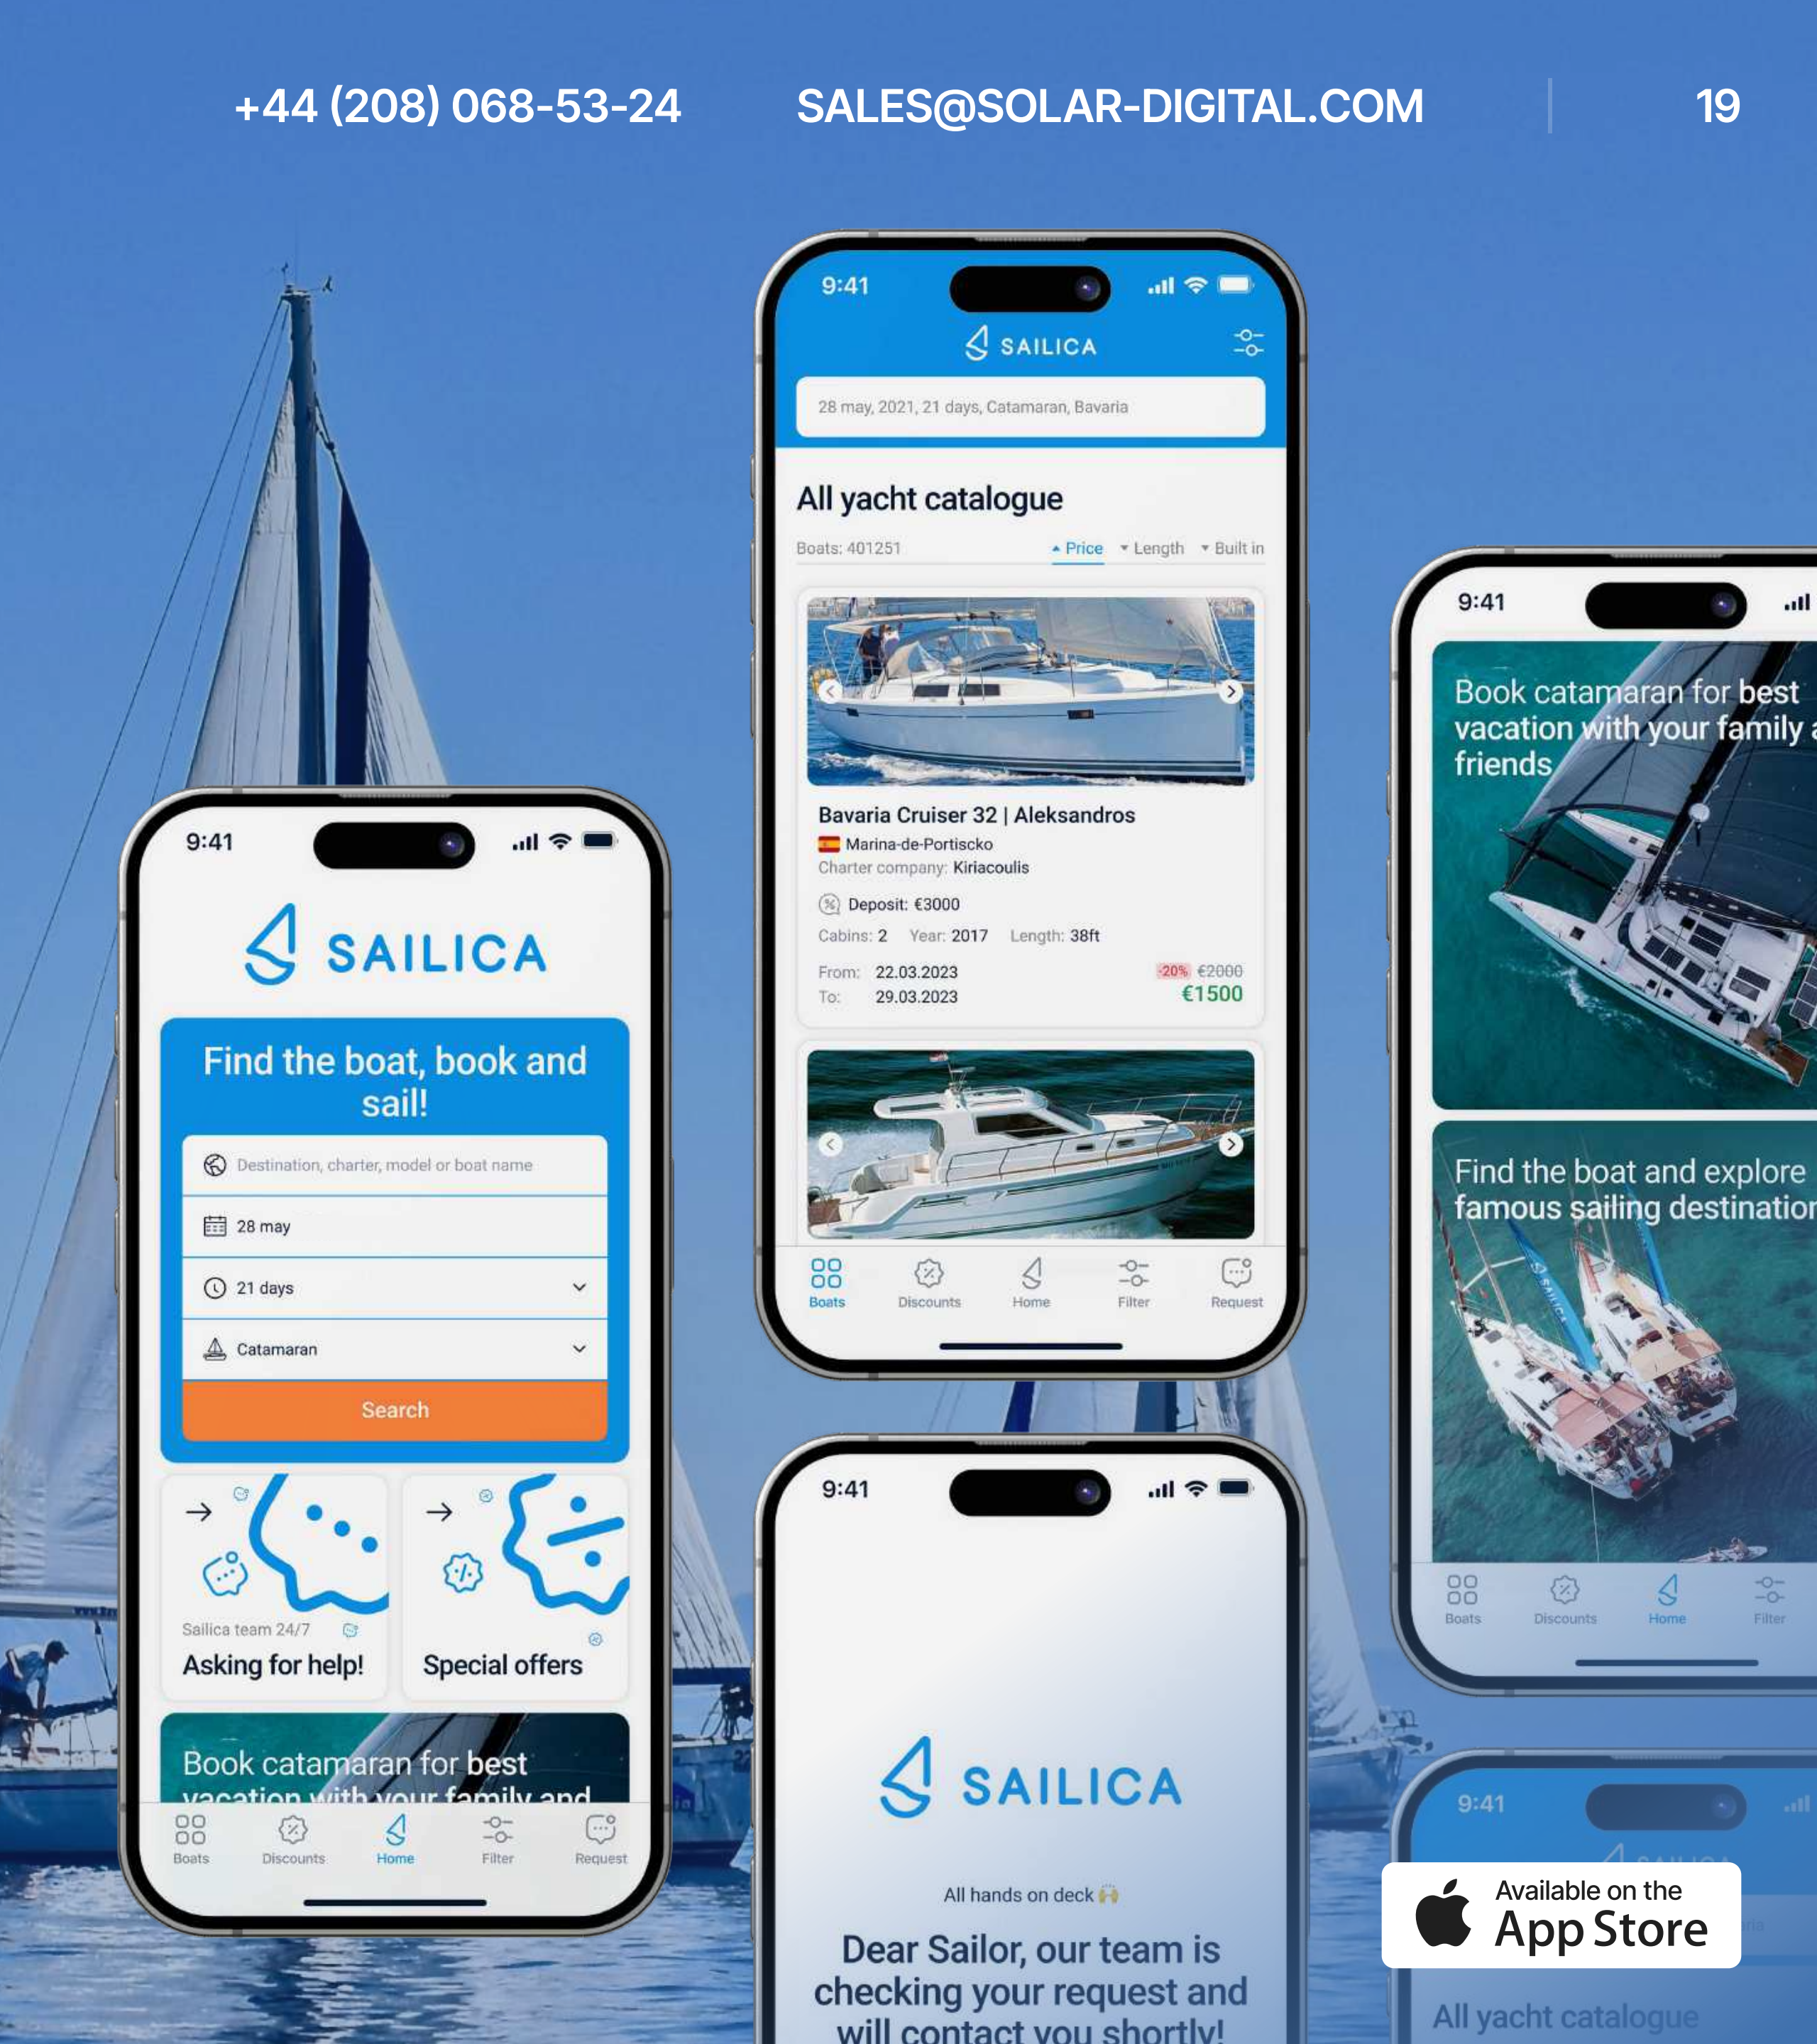

DEVELOPMENT OF ONLINE YACHT RENTAL SYSTEM

Sailica is an online yacht booking system, where skipper can search and book a charter yacht of any type (sailboat, catamaran, motor, etc) and at any destination (from Norway to Seychelles). We did discovery, brand identity, web platform and mobile application. Also we integrated 3 biggest Fleet Management Systems (FMS) inside one database and improved conversion rate from visitors to clients.

Sustayn

BRANDING & WEBSITE FOR SUSTAINABLE COMPANY

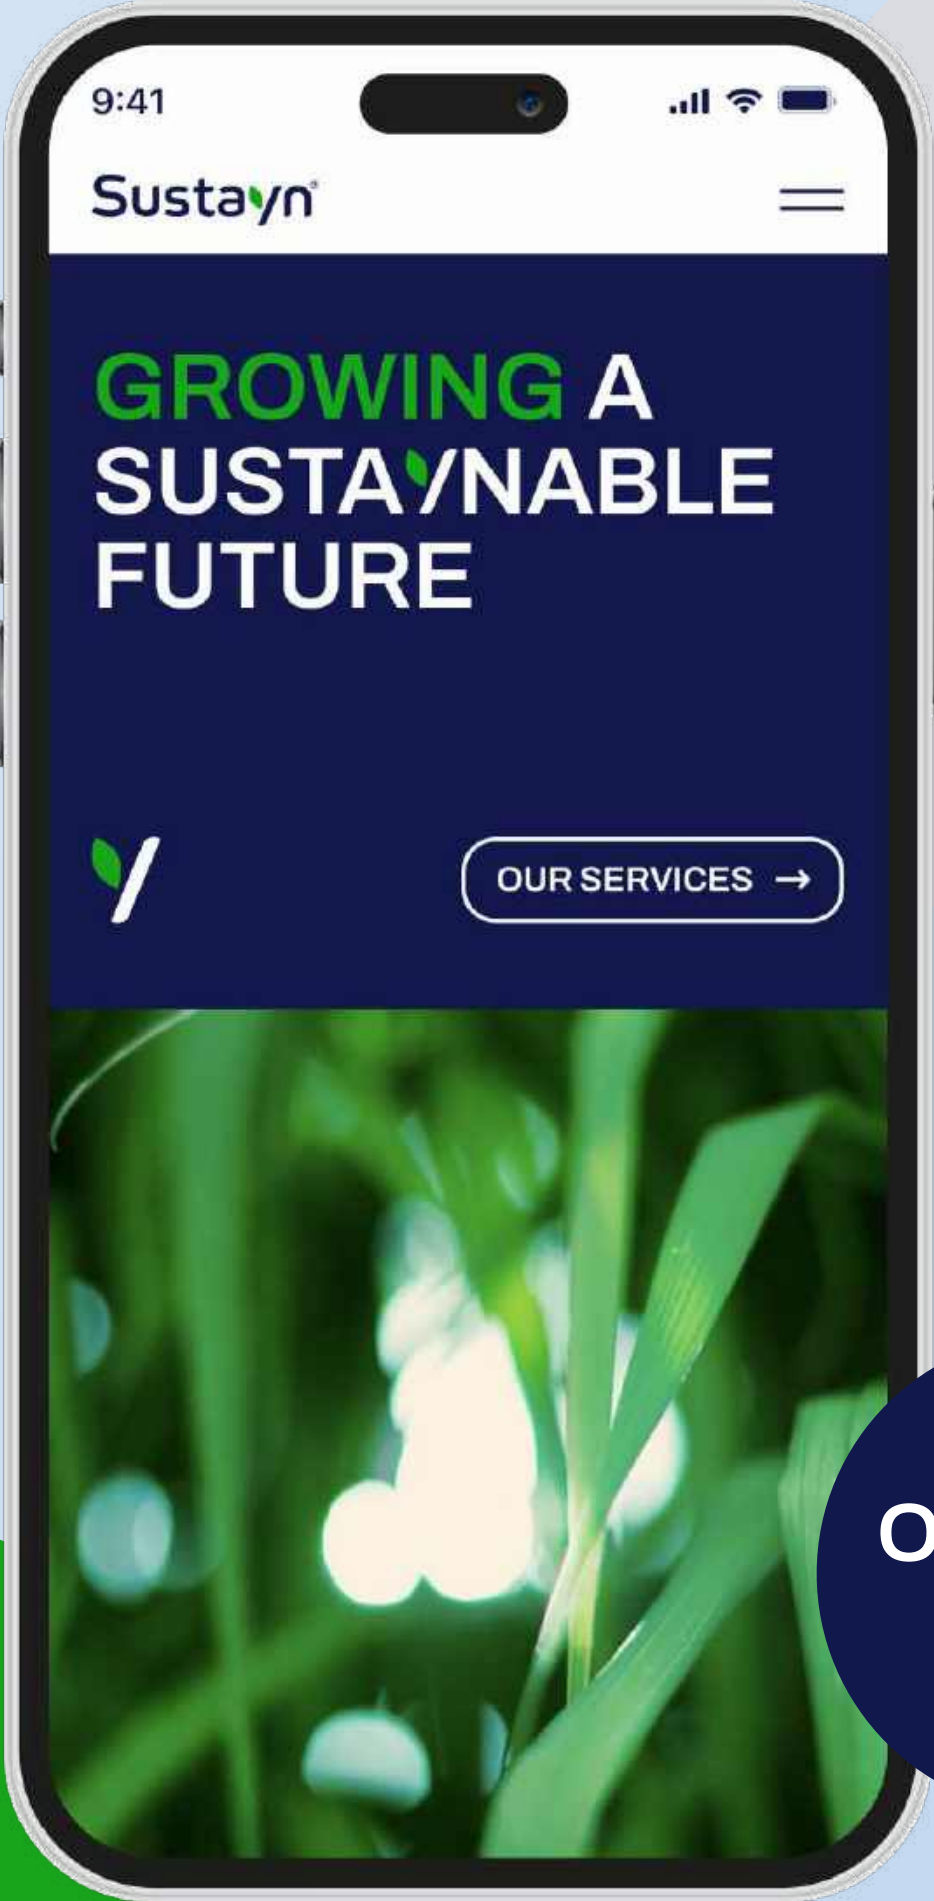

Sustayn is a sustainable eco-business focused on ecological agricultural production. We developed a modern and impressive branding strategy to help them stand out in the saturated eco market.

Our work included creating a unique eco-friendly logo, a color palette, and various branding materials. This new branding highlights Sustayn's eco values and green marketing strategy, ensuring its position as an eco-activist and sustainable company.
